

BioRestNet: a network of biocultural restoration

Felipe Melo

What is the purpose of this presentation?

- Present the principles of biocultural restoration
- Showcase presentation
- The way forward

A brief history of restoration

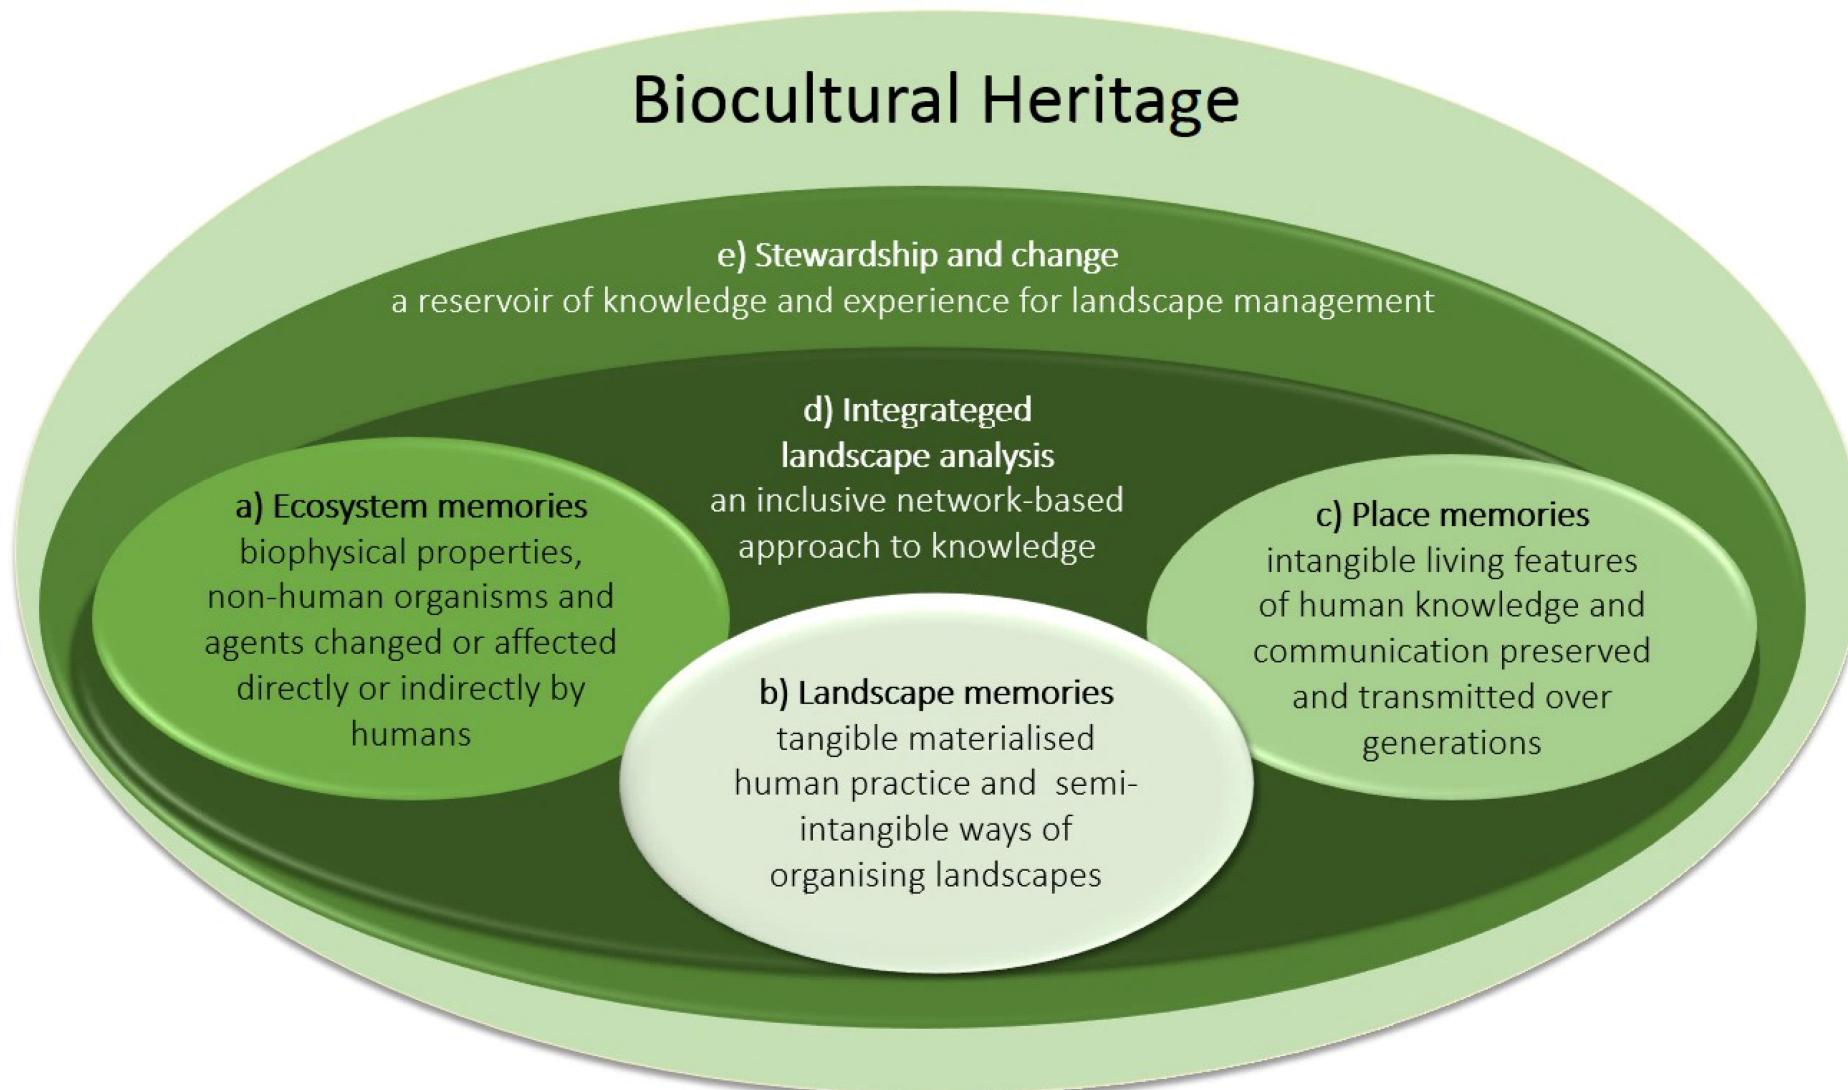

Ecosystem development from a damaged system as related to different treatment approaches:
Restoration, reclamation, rehabilitation, and neglect (i.e., no treatment).

Restoration became business

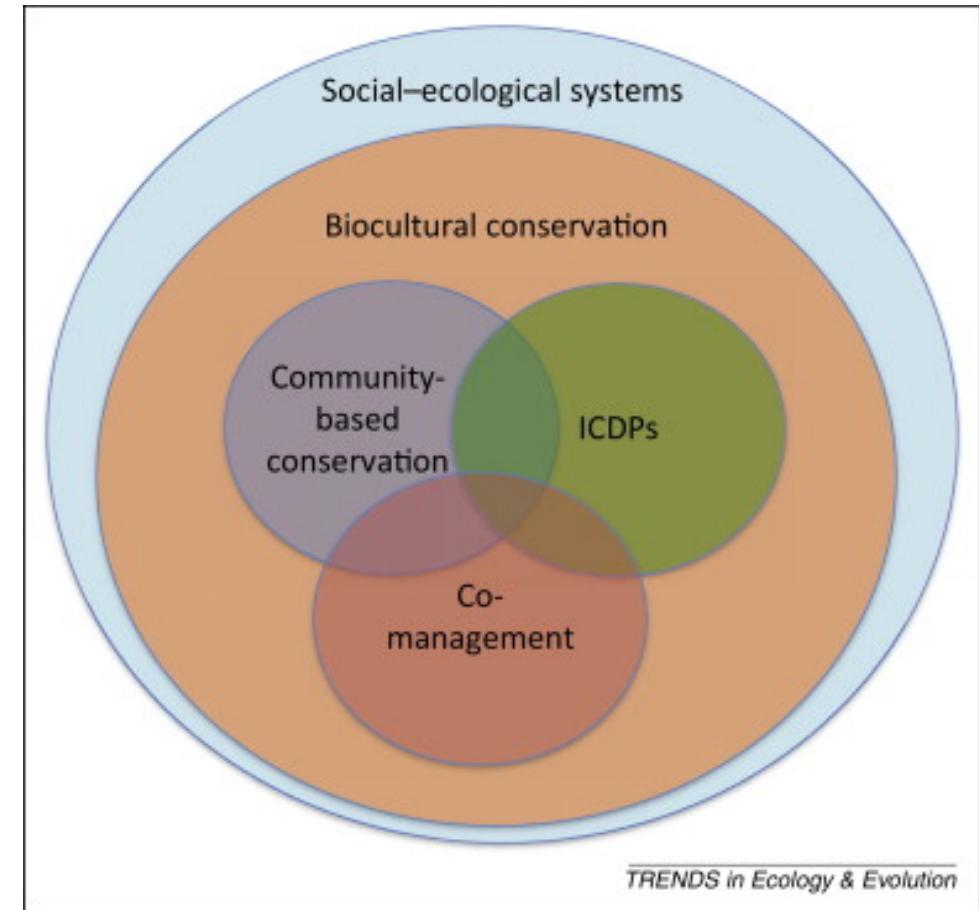

- Carbon-dominated restoration
- Restoration for “nature”
- People has little place in the equation

Biocultural Restoration

Core principles

- Based on TEK
- Potential for social engagement
- Decolonial perspective
- Co-constructed models
- Anti-capitalist

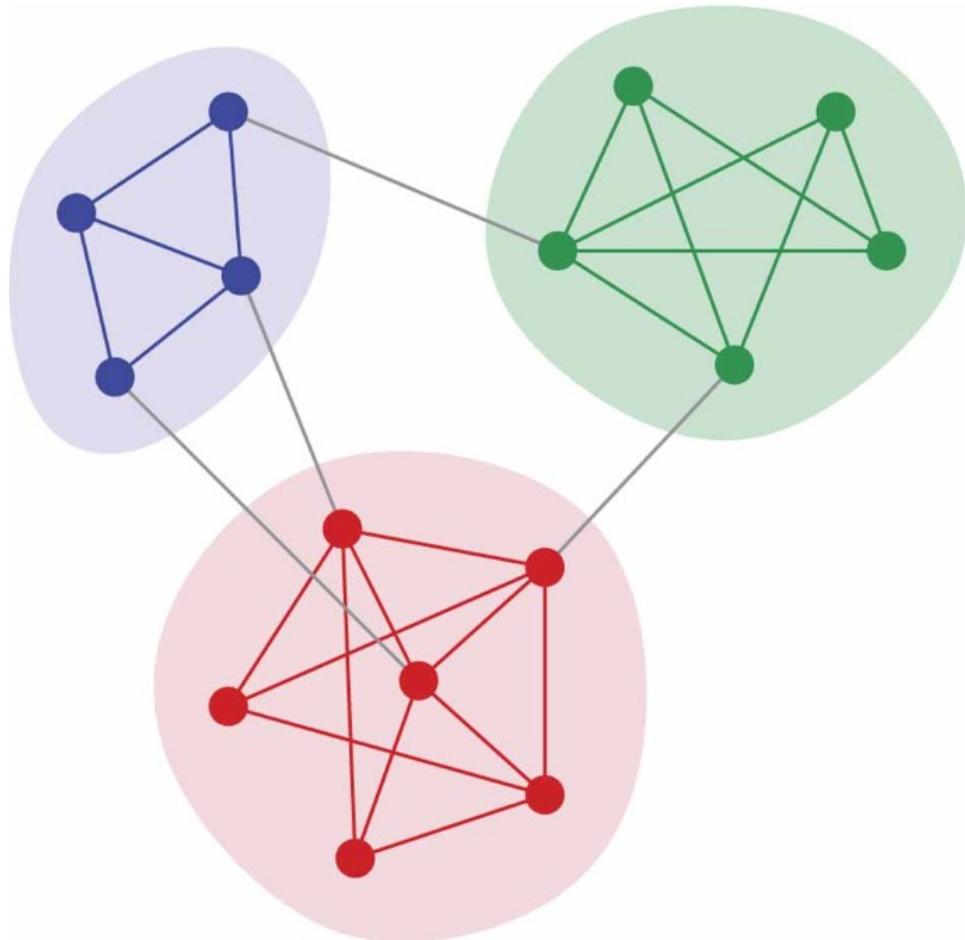

BioRestNet: a network of biocultural restoration

Why a network?

- It is the best way to scale up restoration
- Allows sharing of knowledge
- Strengthen actions
- Creates models

Structuring of the Biocultural Restoration Network

- Create and establish the Network
 - Formalization of network
 - Set principles and mission
 - Intermediate market
 - Public policy intended
